

KIT CARE NON-SKID FLOORING

Safety-Walk™

Safety-Walk slip-resistant materials are excellent for both indoors and outdoors, even around water, oil, grease or chemicals. Constructed with a strong adhesive backing, these materials are made from either textured polymers or hard mineral products. Available in a variety of grades, shapes, sizes and colours. Long lasting and easy to apply and maintain.

Safety-Walk Slip Resistant Matting

Safety-Walk slip resistant matting helps provide safer, more secure footing with its mineral-coated top surface. The raised-rib design is high enough to provide a place for solid and liquid debris to settle out of the way, and its profile is low enough to allow foot traffic and equipment to move easily. Lightweight and easy to handle, it can be cut to fit special size requirements for most industrial applications.
